## For all your parking needs

Project Centre has one of the most experienced parking teams in the UK and offer a comprehensive range of consultancy services to private and public sector clients.

We understand the needs of local authorities and in the current economic climate the need for cost effective parking solutions that are sensitive to the needs of local residents and businesses.

We give advice on the initial development of a parking policy, assess commercial viability, consult on and prepare designs, make traffic orders and supervise construction.

Using the latest technology and techniques, we can advise on optimising parking performance on existing operations and new parking facilities requiring a detailed business case.

## Our services

## We work with

- City councils
- London boroughs
- County councils
- District councils
- Business groups
- Private car park owners
- Railway operators
- Housing associations
- Developers
